

Validate before posting

Do you check incoming data before it enters the ERP – or only after?

- ✓ Item exists
- ✓ Customer known
- ✗ Address missing

THE FRAMEWORK

Validation Profiles – flexibly configurable

Rules per partner

Item, customer, address – you decide

Warning vs. Error

Not every error is equally critical

Validation before posting

Catch problems before they hit

COMPARISON

Before vs. After

EDI PROCESSING WORKSPACE

Without

With

- Error when posting
- Manual correction
- Time lost

Check before posting
Clear error message
Immediate correction

Validation runs directly in Dynamics 365 – full access to master data.

QUESTION FOR YOU

When do you notice a data error – before or after posting?

- Only when the order cannot be processed?
- Or already when the message arrives?
