

2020. No travel. *Six modules.*

What happens when consulting can no longer
board a plane.

Experience doesn't scale by *driving over.*

When the meetings fell away, one question was left: how do 25 years of project knowledge reach a client without me in the room? The answer: in products, not presentations.

01

Mockup

Show it first, discuss it after.

02

Prototype

On a real process, not on a concept paper.

03

Handover

To the Soluvine development team — where the idea becomes a product.

B2B

*Your customer works
with you, not beside
you.*

Business processes across two companies —
one shared set of data instead of two versions
of the truth.

EDI

*No data through
the back door.*

Full transparency for every message. Validation before transfer — not afterwards in a support ticket.

MES

*The shop floor
reports itself.*

Production feedback in the language of the people on the floor — and ready to analyse in Dynamics 365.

WHM

*A warehouse without
paper slips.*

Every movement captured where it happens.
Stock figures nobody has to recount.

ECM

*Audit-proof, without
changing systems.*

The ECM Client keeps every document audit-proof —
inside the archive you already run.

Easy Archive

CLARC Archive

SwiDoc

SharePoint

MetaShare

CMIS

Incoming invoice processing *is next in line.*

Same principle: check before posting. Every module rests on the same foundation instead of standing alone.

NOT BUILT ALONE

The idea was mine. *The engineering was not.*

Every module carries the fingerprints of clients who thought along — built by the Soluvine development team I have worked with for 25 years. Each module in detail: restless365.com

Configurable fitted to your process, not the other way round

30-day trial no obligation to buy

Microsoft AppSource every solution available there — soluvine.com
