

When something **goes wrong**

How quickly do you spot EDI errors – and how fast can you react?

-  Error detected
-  Cause visible
-  Action pending

THE MONITORING

Admin Dashboard with error overview

Immediate visibility

Errors appear instantly

Drill-down to cause

From error to message

Auto-retry option

Temporary errors automatically

IN PRACTICE

Error dashboard in Dynamics 365

EDI PROCESSING WORKSPACE

12 errors today → **8** auto-retry → **4** action needed →

- | | |
|-------------------------|---------------|
| • Item not found | PO-2024-5678 |
| • Validation failed | SO-2024-1234 |
| • Auto-retry successful | INV-2024-9012 |

You see not just that something went wrong – but exactly what and why.

QUESTION FOR YOU

How do you learn about EDI errors today?

- Email alert, then searching multiple systems?
- Or immediate transparency in ERP?
